Import RDF

The following three-step procedure helps to form the command to upload data to an RDF store.

Step 1: Choose the graph to upload data to.

`https://manual.sparqling-genomics.org (moonstone) ▼`

Step 2: Choose an access token

This token will be used to authenticate with to the endpoint.

`Web ▼`

Step 3: Choose the data format

Which type of file are you going to upload?

`N-triples ▼`

The command to import data is:

```
$ curl --cookie "SGSession=HR086d8XKF3IyqTq8L7nWJRzmG8EyrzAoCkrLMOBiNDHZP2m91cjeGRU8cHPevUWNzLXX6Pt5q90UXEipOHZ" \
      --request POST \
      --header "Accept: application/xml" \
      --header "Content-Type: application/n-triples" \
      --data-urlencode "graph=https://manual.sparqling-genomics.org" \
      --get http://127.0.0.1:8001/api/import-rdf \
      --upload-file /path/to/your/file
```
